However, Applicant discloses supporting mechanism, according to specification it is for supporting an optical pickup, wherein each of the supporting members is opened in a radius direction of the supporting shaft, enabling the supporting shaft to shift in the radius direction thereof to be received in the supporting member, which is not found in Igawa and Hasegawa's device.
 - Applicant asserts that in such a configuration, it is unnecessary to form the whole bodies of the supporting members with a high procession, which helps to reduce manufacturing cost of the feeding unit itself (Specification, p. 5, lines 25-27).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
